What's with the wall?

Retaining walls can be necessary for many reasons and can also be an aesthetically appealing feature of a larger landscape design. Precision's team can help you determine when and where they are necessary on your property. Here are a few ways walls can help:

- 1. Walls are often placed around a building to help ensure proper water drainage away from your foundation.
 - a. If your siding steps up or down in areas around your structure exposing the foundation, this often indicates that the building designer intended for a retaining wall to be placed there.
- 2. Retaining walls can bring function to unusable spaces.
- 3. A proper wall can help prevent erosion by slowing down water flow through steep slopes and terrain.
- 4. Retaining walls can make hills & slopes easier & safer to navigate.
- 5. Gardens and planter beds can be raised up off the ground using retaining walls, eliminating some of the worry of certain pesky varmints ravishing your plants and flowers.
- 6. Retaining walls, along with Precision's expertise, can make your walkout basement dream a reality.

Precision Walls are designed to last a lifetime. We have proven this with retaining walls that are more than 35 years old and look as good as new.

Window Wells & Walk-outs

It's time to let in some light.

Block, natural stone, and timbers all allow you to carve out some space to bring more light and function into your home.

A. Window wells

Window wells are a great way to bring in more light and allow for larger windows in your home or business. With many design options and materials available, window wells can be a statement, a piece of art, or a simple yet functional well. Speak with a Precision representative today to see how much light you could be letting into your life.

B. Walkouts

If you ever thought or been told you couldn't have a walkout in your home because of the height or grade around your property, you have been talking to the wrong people. Leave it to the professionals at Precision to help walk you through everything that is required to make your dreams a reality.

Planter Beds & Raised Gardens

Why raised beds?

Raised beds have many benefits over traditional in ground gardens. They keep pathway weeds from your garden soil, prevent soil compaction, provide good drainage, and serve as a barrier to pests such as slugs and snails.

Raised planter beds aren't just for looks. They are also a great way to simplify plant inspection and save your back a lot of aches and pains from being bent over while caring for your plants.

A. Tiered Planter Beds

Keep your gardens together but separate by layering out your planters. This is a great way to keep fruits and vegetables separate or showcase your flowers.

B. Natural Stone Planters

Natural stone can be a great way to make your planters feel more natural, and add a unique accent to your landscape.

C. Block Planter Beds

Block planters are a great way to create custom planters that are built to last.

D. Timber Planters

Timbers are a cost effective and efficient way to define your garden and give you the space to grow the garden of your dreams.

Retaining Walls

Have you ever wondered what to do with that wasted space of a hill in your yard? Leave it to the professionals to come in and push that slope aside and give you a more level and more usable space that you have always dreamed of. Don't let that hill hold you back, let us hold that hill back with a brand new Precision retaining wall. Whether you want a space for a pool, a place for you and your family to play, or to just make your yard more navigable, Precision has got you covered.

A few of our block wall styles

A. Engineered Block

These mega blocks are built to hold back huge hills. With a width of 4' and height of 18" tall and weighing over 2100 lbs. they will get the job done and can be stained a variety of desirable colors.

B. Straight Face Block

Weighing in at over 80 lbs. apiece, these 7"x18" blocks will get the job done in a stylish & effective way.

C. Three Face Block

These blocks are 7" tall & 18" wide, & offer a textured look in a variety of colors & blends.

D. Rugged Series Block

This 7" tall block comes in three widths of 6", 12", & 18" & a variety of unique colors & blends.

E. Weathered Edged Block

These 7"x18" blocks weigh over 80 lbs. apiece, & will get the job done in a stylish & effective way.

Natural Stone Walls

Precision's expert installers work with a variety of natural stone to build you the perfect natural stone wall.

A. Limestone Boulders Walls

Limestone boulders come in a variety of shapes, shades, and sizes and can give your yard a new look.

B. Chilton Stone Walls

These slab stones can give your property a unique look and brighten up your yard.

C. Field Boulder Walls

Field boulders are often more rounded with a great range of colors and mineral veins in each stone. They can bring a soft look to any landscape.

D. Stone Water Breaks

Natural stones and boulders can be placed strategically in high water flow areas to slow the flow and prevent erosion while also adding beauty and accent to your properties landscape.

Other stone options are available and Precision's team can help find what is right for you.

<u>Timber Walls</u>

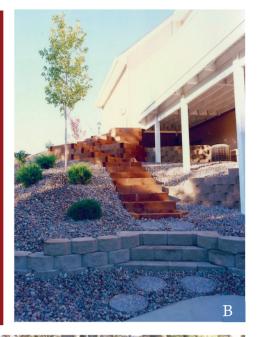

The Professionals Since 1981

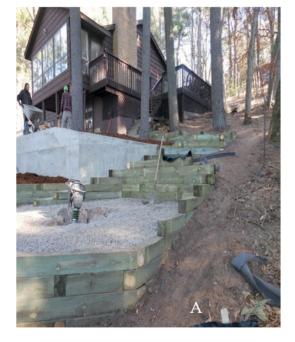

PRECISION

LANDSCAPING & CONSTRUCTION, INC.

From design to install, Precision does it all. Timbers have been used for years and can be a cost effective way to help hold back a hill. Timber walls can last more than 25 years, just ask us and we will show you some of our jobs that we did almost 30 years ago.

A. Green Treated Timbers

These 5" x 6" timbers are treated to help them last longer and stand up to the harsh elements of the Midwest.

B. Cedar-tone Timbers

These 5" x 6" timbers are stained to darken and preserve the wood. The stain adds a pop of color as well giving it a more finished look.

Freestanding / Sitting Walls

Freestanding & sitting walls are constructed for both the aesthetics of defining a space and the function of being used as a bench.

A. Smooth tumbled block

JME & Rochester tumbled freestanding block can be put together in many unique ways to build a unique back yard oasis.

B. Rough face block

Freestanding block is a solid product that can be a great way to blend freestanding walls with other retaining walls.

Properly incorporating a freestanding wall into a design can bring privacy, functionality, and definition to any unique outdoor living space.

Pillars & Mailboxes

Pillars and mailboxes are created in the same manner, with the same materials, as freestanding and sitting walls are constructed. Pillars are often used in tandem with freestanding walls to add additional structure along with a more finished appearance to the overall design. However pillars can also be used on their own to help define spaces. Pillars can be capped with many different materials ranging from precast concrete caps to natural stone slabs. Pillars can also incorporate many different accessories including but not limited to under cap lights, glass blocks for lighting, fire bowls, and even water fountains. Pillars can also be a great way to spruce up your fence by breaking up the flow of the fence with a simple but elegant decorative touch. Regardless of your landscape's design, Precision can customize the overall fit and finish to match.

Pillars/ Mailboxes Material Options:

- A. Smooth tumbled block
- B. Rough face block
- C. Mix the two for a custom finish

Staircases & Terrain Navigation

Perfect on their own or as part of a larger design

Don't struggle any longer; Precision's expert crew of designers and installers can make slipping and sliding up and down that pesky hill a thing of the past.

A. Block Staircase

Block staircases are a great way to make your walk easier. We can build your staircase to be exactly what you need for your property.

B. Natural Stone Stairs

Whether it's boulders or slab stone Precisions crew can build whatever you need for your property.

C. Pre-cast solid steps

These 4' long 250 lbs. seamless stairs elevate your landscape.

D. Paver Veneer

Veneering your steps can blend any step perfectly into your patio design.

E. Timber Stairs Timbers are also an option for navigation.

F. Terrain Ramps Ramps can make mowing & moving easier than ever before.

*Ask about barn plank.
