

PRECISION

LANDSCAPING & CONSTRUCTION, INC.

Decks

Decks

Choose either maintenance free decking that gives you dozens of style options, or go with a traditional yet beautiful cedar deck. Our team will build the deck of your dreams. It's like adding another living space to your home.

Railings

Add beauty and safety to your deck or stair case. There is an endless amount of railing options out there. Let Precision help you find the railing that is right for your unique structure.

Wood Structures

Precision can accent your property with a beautiful hand-crafted wood structure. Pergolas, trellises, privacy panels, and other shade structures will add style and functionality to your property.

Wood Working & Shade Structure Options

A. Trellises

Trellises are often built to support climbing plants or vines, but with Precision craftsmanship, Trellises look great on their own too. They make great privacy dividers or accent pieces to fill a void in the yard or accent a wall.

B. Arbors

Arbors can often resemble “tunnels” because of the lattice or woodwork that surrounds the sides and roof. Vines or other such plants can be planted to grow up on them.

C. Pergolas

Pergolas by Precision can be as simple or as elegant as you like. They provide a bit of shade to any space and we can customize your Pergola to fit your design and budget.

D. Decks

Precision can build you a custom deck with a variety of materials to perfectly meet your functional & design needs.

E. Gazebos

Precision gazebos are roofed structures that can be enclosed with screen, glass, or left open if you choose.

F. Shade Sails & Umbrellas

Precision can install a variety of different umbrellas and sails that can cover any area you desire.
