## Snow & Ice Management

**SIMA**  
snow & ice management association

**TOP100**  
Snow Contractors

**ASCA**  
Accredited Snow  
Contractors Association

### Snow Plowing

Precision's team of experienced equipment operators will clear your lot in the most efficient and effective way. Precision has the capacity to handle any size property & always gets the job done.

### Ice Control Plans

Precision's team is certified in salt application and will use the appropriate salting method contingent on the ice conditions. Whether it is rock salt, treated salt, or liquid brine, Precision will keep your lots safe!

### Snow Hauling/Stacking

If snow is taking up valuable space in your parking lot or obstructing peoples view, Precision can haul it off-site, re-locate it on site, or simply blow it back away from those areas, leaving you with more room.

## Educated & Experienced

Precision has taken the time to certify our employees in smart salt application. We believe that we have reduced the amount of salt that we are using on roads and parking lots in our community. We have lessened our impact on the environment while also becoming more efficient and effective at de-icing. We have done this by...

- Training our employees on smart salt practices
- Calibrating our salting equipment so we know the proper amount of salt to apply
- Clean up any excess salt after a storm
- Use the proper type of salt for the weather conditions
- Continuing to improve our liquid-salting process

## The Importance of Preparation

Mother Nature is very unpredictable.

Our team will take the time to walk through your property to develop site maps, snow storage areas, and the proper strategies to ensure your lot is safe and clear as possible no matter what type of winter weather event occurs.
