

# PRECISION

LANDSCAPING & CONSTRUCTION, INC.

## Turf Maintenance

### Lawn Mowing

Precision's team of trained professionals will work with you to find what care contract will benefit your property the most. Spring & Fall cleanups along with expert lawn care will keep your property looking great all year long!

### Fertilization

Precision's team of trained, licensed, and insured experts will give your turf exactly what it needs to be healthier and have fewer weeds than before. Our fertilization plans are offered from April to November and are flexible to accommodate your needs!

### Weed Control

Don't let pesky weeds ruin your properties curb appeal. Regular feeding allows your lawn to reach its full potential because thick and healthy grass discourages weed penetration.

## Additional Services

With our wide variety of year-round maintenance service options, we want to help you save the time and the worry of dealing with property maintenance.

### Tree & Shrub Pruning

-Proper pruning of trees and shrubs is key to maintaining health, hardiness, and visual appeal. Precision's team will trim your property in the spring and fall to keep your plants looking great.

### Dethatching

Too much thatch in the lawn prevents water and oxygen from getting down to the root system of the grass.

### Core Aeration

Core aeration is intended to assist the process of air exchange between the soil and atmosphere to help roots grow deeper and stronger. We also recommend that an overseeding application is done after core aeration.

### Bed Maintenance

Precision can help you protect your landscape investment and keep your property looking brand new. We will pull/spray weeds and make sure all landscape beds are in great shape.

Take the Worry out of Property Maintenance,  
Trust the Professionals!
